Potenti duis semper luctus per accumsan litora nulla id ridiculus: dui penatibus? Neque euismod porta hac.

III. RESULTS

The regression analysis revealed that for every additional 1,000 pounds of weight, the car's miles per gallon decreases by an average of –5.34 units (p = 0). This model explains 0.75% of the variance in fuel efficiency, indicating a strong relationship between car weight and mpg. The model's F-statistic is 91.38, with a p-value of 0, demonstrating the statistical significance of the regression model.

The following portion of code [geom_smooth()using formula = 'y ~ x'] still shows in the rendered text even though I have set#| echo: FALSE`.

```
`geom_smooth()` using formula = 'y ~ x'
